## PROFESSIONAL EXPERIENCE:

# Software Engineer II: Bank of America

#### September 2022-Present

- 2<sup>nd</sup> place regional winner: 2023 Enterprise Risk & Finance Technology Innovation Challenge. 400 participants. Idea: "Operations Dashboard" connecting several data and reporting sources into one web-app for enhanced organization-wide operations capabilities.
- Built React.js application to enable my team to execute various configuration changes and DML to a Java application and SQL database.
- Enforce proper functional and unit testing (and evidence captures) prior to each release cycle.
- Lead remediation of all security vulnerabilities found within all software across the stack.

### Software Engineer: Bank of America (Contractor, Diversant LLC) M

March 2022-October 2022

- Built application that streamlined transaction adjustments and regulatory reporting processes
- Developed a VSCode Extension using React and TypeScript to support data processing efforts.

# Associate Web Developer: Council on Foreign Relations

October 2020-March 2022

- Developed sites, data visualizations, and internal software for the Editorial and Research teams.
- Engineered data visualization toolchain, allowing designers to create responsive, embeddable interactive & static infographics within CFR Editorial articles at the click of a button.

# Design Technologist: Council on Foreign Relations

April 2017-October 2020

- Developed CFR's first responsive email newsletters and standardized their UI using MJML, increasing subscribership across the 70+ newsletters.
- Developed data visualizations and interactive slideshow for the CFR Editorial team.

#### Adjunct Lecturer: Stony Brook University

Seasonal: 2015, 2017, 2022

- Developed website to showcase student-journalists work on a React.js and Gatsby website.
- Led undergrad and graduate student trips to Hawaii and New Mexico to instruct journalism as they reported on NASA's geological field research in support of the upcoming Lunar mission.

# PROJECTS: View these selected projects at https://kevinlizarazo.com

Concierge: Tuning Into Your Music Tastes with the Power of AI

Reporting RISE: A Collaboration with NASA and Stony Brook University Vallenato: An interactive/static data visualization generation system

#### **SKILLS:**

Front-end: React.js, Next.js, TypeScript, HTML5, CSS, Material UI

Back-end: Node.js, Express.js

Version Control: GitHub, BitBucket

CI/CD: Ansible, Jenkins, CircleCI, OpenShift

SQL, Jira, Agile Development, qTest

### **EDUCATION:**

B.S. Computer Science, Oregon State University, expected graduation May 2025

B.A. Political Science & Journalism, Stony Brook University, 2014
