FULL-STACK WEB DEVELOPER — WORDPRESS, DRUPAL, PHP, JAVASCRIPT/REACT — 9+ YEARS

Independent Practice — Lizarazo Studio & Freelance

lizarazostudio.com

Lizarazo Studio - Independent Consultant, Software Engineer

May 2025 - Present

- Deliver editorial CMS platforms, React/Next.js microsites, and data visualizations for civic-sector clients.
- Develop AI tooling for editorial research teams — RAG-based retrieval and report-to-web pipelines with grounded, verifiable citations (Claude & OpenAI APIs).

Freelance Software Engineer

2020 - 2025

- Designed & built custom WordPress platforms for CalMatters and The B Team — custom themes, custom Gutenberg blocks, and tailored editorial publishing workflows (PHP, MySQL, JavaScript).
- Designed & built the original WordPress version of *reportingrise.com*, a journalism project launched in partnership with Stony Brook University & NASA.
- Collaborated remotely with client editorial, design, and campaign teams from concept through launch, including delivery of The B Team's *New Leadership Playbook*.

Stanley Black & Decker - MSUITE (DEWALT Construction Technology)

Senior Software Engineer

May 2025 - Present

- Maintain & extend MSUITE FAB, a full-stack SaaS platform used by fabrication companies to track shop productivity, delivering features and fixes across React, PHP, Express.js REST APIs, and the SQL data layer.
- Diagnose & resolve production issues for all active customer sites on a fully remote team, working the full stack from UI to database.
- Design & implement AI-assisted engineering workflows — LLM-based code review, automated test generation, and documentation pipelines (Claude & OpenAI APIs, MCP).

Bank of America

Software Engineer II

Sep 2022 - May 2025

- Created inventory platform on React visualizing application products & their interconnected data-streams, with built-in reporting & outage simulation tools; Finalist, 2024 Innovation Challenge.
- Led rewrite of Java app to React to support configuration and patching activities for risk rating fintech software, used by 50+ engineers and analysts across 2 regions.

Software Engineer Contractor, Diversant LLC

Mar 2022 - Sep 2022

- Built a fintech microservice app using React & REST APIs to streamline transaction adjustments & reporting.

Council on Foreign Relations

Web Developer / Design Technologist

Apr 2017 - Mar 2022

- Developed features and Drupal site configuration for CFR.org, developing across PHP, JavaScript, SQL.
- Created command-line tooling to automate the creation and deployment of interactive graphics.
- Developed data visualizations supporting CFR's web publications.

TECHNICAL SKILLS & TECHNOLOGIES

WordPress & CMS: WordPress custom themes, Gutenberg blocks, plugin development; Drupal site configuration; Gatsby; platform migrations; custom editorial workflows

Languages: PHP, JavaScript (ES6+), TypeScript, SQL, Python, Java, HTML5/CSS

Back-end & Databases: REST APIs, Node.js, Express.js, MySQL/MariaDB, Postgres, Oracle, Prisma

Front-end: React, Next.js, Redux, Tailwind, Material UI, Vite

Data Visualization & Design: D3.js, Leaflet, interactive graphics, design systems, Figma

AI Engineering: RAG pipelines, report-to-web automation, OpenAI & Anthropic APIs, Claude Code

DevOps: GitHub & Git-based workflows, AWS, Jenkins, CircleCI, Azure, Vercel, Netlify

EDUCATION

Stony Brook University

Bachelor of Arts in Journalism & Political Science, coursework toward Computer Science

Aug 2009 - May 2014
