SENIOR FULL-STACK ENGINEER — REACT, TYPESCRIPT, NODE — AI/LLM — 9 YEARS.

Stanley Black & Decker - MSUITE (DEWALT Construction Technology)

Senior Software Engineer

May 2025 - Present

- Maintain & extend MSUITE FAB, a full-stack SaaS platform used by fabrication companies to track shop productivity, delivering features and fixes across React, REST APIs, and the SQL data layer.
- Design & implement AI-assisted engineering workflows for the team, LLM-based code review, bespoke agents, automated test generation, and documentation pipelines — built on Claude & OpenAI APIs and the Model Context Protocol (MCP)
- Diagnose & resolve production issues across the MSUITE platform for all active customer sites, working the full stack from UI to database.

Lizarazo Studio

lizarazostudio.com

Principal

July 2015 - Present

- Deliver editorial CMS platforms, React microsites, and D3/Leaflet data visualizations for civic-sector clients including CalMatters, The B Team, and Stony Brook University & NASA.
- Build AI tooling for editorial research teams, including RAG-based retrieval and report-to-web pipelines with grounded, verifiable citations (Claude & OpenAI APIs).

Bank of America

Software Engineer II

Sep 2022 - May 2025

- Created inventory platform on React visualizing application products & their interconnected data-streams, with built-in reporting & outage simulation tools; Finalist, 2024 Innovation Challenge.
- Led rewrite of Java app to React to support configuration and patching activities for risk rating fintech software, used by 50+ engineers and analysts across 2 regions.

Software Engineer Contractor, Diversant LLC

Mar 2022 - Sep 2022

- Built a fintech microservice app using React to streamline transaction adjustments & reporting processes.
- Developed a VSCode Extension using React and TypeScript to support data processing efforts.

Council on Foreign Relations

Web Developer / Design Technologist

Apr 2017 - Mar 2022

- Developed features for CFR.org using technologies across the full web stack.
- Created command-line tool to help automate the creation and deployment of interactive graphics.
- Developed data visualizations, and tools to support CFR's web publications.

TECHNICAL SKILLS & TECHNOLOGIES

Languages: TypeScript, JavaScript, Python, Java, SQL, PHP, HTML5/CSS

Front-end: React, Next.js, Redux, Tailwind, Material UI, Vite

Back-end & Databases: Node.js, Express.js, Spring, Prisma, Postgres, Oracle

Data Visualization & Design: D3.js, AG Grid, Leaflet, interactive graphics, design systems, Figma

AI Engineering: RAG pipelines, editorial agents, report-to-web automation, OpenAI & Anthropic APIs, Claude Code

CMS & Editorial Publishing: WordPress, Drupal, Gatsby, platform migrations, custom editorial workflows

DevOps & Security: AWS, GitHub, Jenkins, CircleCI, Ansible, OpenShift Kubernetes, Azure, Vercel, Netlify

EDUCATION

Stony Brook University

Bachelor of Arts in Journalism & Political Science, coursework toward Computer Science

Aug 2009 - May 2014
